PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Diagnosed and resolved P1/P2 incidents for enterprise applications, maintaining service level agreements through analysis of logs in **Splunk** and **Dynatrace**.
- Automated data extraction and reporting processes using **Python** scripts, reducing manual effort by approximately 40% for the operations team.
- Executed complex SQL queries across **PostgreSQL** and **Oracle** databases for data validation and ad-hoc analysis supporting production issue resolution.
- Contributed to the development of a financial-services operations dashboard, implementing bug fixes and minor feature enhancements in **Java Spring Boot**.
- Managed and prioritised incoming requests from internal IT support functions, ensuring timely resolution and clear communication with stakeholders.
- Configured and maintained **application monitoring** and alert systems, including setting up new checks and testing system changes prior to deployment.
- Remotely managed and monitored server hosts across multiple European data centers, ensuring system stability and availability.

SKILLS

Application Support – Incident Management, Root Cause Analysis, SLA Management, Change Management, Release Management, Production Support

Monitoring & Logging – Splunk, Dynatrace, CloudWatch, Log Analysis, Alerting Systems

Programming Languages – Java, Python, SQL, Shell Scripting

Databases – PostgreSQL, MySQL, Oracle

Frameworks & Tools – Spring Boot, Jenkins, Git, Docker, Jira, Confluence, Linux

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

PROJECTS

Financial Operations Dashboard Enhancement

- Enhanced a **payments operations dashboard** by developing **Python** scripts to automate data ingestion from various sources, improving data refresh times by 30%.
- Supported the **transaction monitoring** workflow by implementing new alerting rules in **Splunk** based on business analyst requirements, reducing manual oversight needs.
- Collaborated with cross-functional operations teams to triage and resolve production issues, ensuring adherence to strict operational and regulatory awareness standards.

Batch Scheduling & Monitoring System Upgrade

- Managed and upgraded the **batch scheduling environment**, migrating configurations and ensuring seamless operation post-deployment.
- Implemented automated health checks and diagnostic scripts using **Python** and **Linux** shell scripting to proactively identify potential issues in the server infrastructure.
- Configured new alert thresholds within the **monitoring systems**, reducing false positives by approximately 15% and improving incident response times.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
