HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **TCP/IP** network monitoring tools in Python, processing ~5,000 network events per hour to identify latency anomalies.
- Developed **Java** backend services for system integrations, including robust error handling and REST API endpoints for inter-service communication.
- Automated **Linux** system administration tasks using shell scripting, reducing manual intervention for log analysis and cron job management by 40%.
- Contributed to the development of **production trading network visibility tools**, following specifications from senior engineers and participating in code reviews.
- Gained exposure to **hardware internals**, including RAID and CPU architecture, through hands-on analysis of system performance logs.
- Participated in **Agile ceremonies** and sprint planning, providing technical estimations for feature development and bug fixes.
- Containerized applications using **Docker** and deployed them to **AWS EC2** instances, ensuring consistent environments for development and production.

SKILLS

Networking – TCP/IP, Switching, Routing

Object-Oriented Languages – Java, Python

Hardware – RAID, RAM, Busses, NICs, CPU Architecture

Development Tools – Docker, Git, Jenkins

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

Operating Systems – Linux

PROJECTS

Network Performance Monitoring Service (HCL Technologies)

- Developed a **Python**-based service to ingest real-time network traffic data, analyzing packet loss and latency metrics.
- Implemented **alerting mechanisms** integrated with Splunk for immediate notification of network degradation events affecting enterprise customers.
- Designed data structures in **PostgreSQL** to store historical network performance data, enabling trend analysis and capacity planning.

Automated System Health Dashboard (HCL Technologies)

- Built a dashboard application using **Java Spring Boot** to aggregate system health metrics from various sources, including **AWS CloudWatch**.
- Developed REST APIs to expose system status endpoints, facilitating integration with broader IT operations platforms.
- Wrote **shell scripts** to collect system resource utilization data (CPU, RAM, disk I/O) from Linux servers for ingestion into the dashboard.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
