HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Administered enterprise **SAN** and **NAS** platforms across a multi-petabyte production environment, ensuring high availability and performance for critical financial workloads.
- Managed **storage provisioning**, **migrations**, and **replication** activities for diverse storage arrays, supporting application teams with timely capacity expansions.
- Troubleshot complex storage, backup, and connectivity issues within **Linux**, **Windows**, and **virtualised environments**, restoring service to affected systems within defined SLAs.
- Developed automation scripts using **Python** and **shell scripting** to streamline repeatable infrastructure tasks, reducing manual intervention by approximately **30%** for routine provisioning.
- Maintained comprehensive technical documentation for storage and backup configurations, facilitating knowledge transfer and supporting cross-team collaboration on infrastructure projects.
- Participated in on-call rotations for incident response, effectively triaging and resolving P1/P2 storage and backup-related incidents to minimize business impact.
- Configured and maintained **Commvault** backup jobs, successfully performing over **500** restore operations and ensuring data recovery readiness for key production databases.

SKILLS

Storage Platforms – SAN, NAS, Fibre Channel, iSCSI, NFS, SMB, Netapp, Pure Storage, Dell Technologies, VAST Data

Backup & Recovery – Commvault, Backup Administration, Disaster Recovery, Data Replication, Restore Operations

Operating Systems – Linux, Windows Server

Virtualisation – Openstack, VMware, Hyper-V, Citrix

Automation & Scripting – Python, Shell Scripting

Networking & Protocols – TCP/IP, DNS

Infrastructure Management – Capacity Planning, Performance Monitoring, Incident Management, High Availability

PROJECTS

Enterprise SAN/NAS Platform Health and Automation

- Engineered Python scripts to automate the monitoring of **SAN fabric** health and **NAS mount point** capacity, integrating alerts into a central observability platform.
- Streamlined the process for provisioning new **NFS shares** and **iSCSI LUNs** by developing a CLI tool, reducing average setup time from 45 minutes to 15 minutes.
- Documented best practices for storage configuration and troubleshooting, contributing to a reduction in recurring incident tickets by approximately **20%**.

Commvault Backup & Recovery Enhancement Initiative

- Optimized **Commvault** backup schedules and retention policies for a 1.5PB data set, improving backup success rates to over **98.5%** and reducing storage consumption by **12%**.
- Implemented and tested disaster recovery procedures for critical databases, ensuring successful restores within RTO targets during simulated failover exercises.
- Developed shell scripts to automate daily backup job status reporting, providing key operational metrics to the infrastructure team via email digests.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
