PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Assessed technology risks across applications, infrastructure, and operational processes for a financial services client, identifying control gaps and proposing proportionate improvements to mitigate business impacts.
- Reviewed control designs and operational evidence for key technology systems, documenting findings and collaborating with control owners to enhance evidence quality and address identified weaknesses.
- Drove remediation efforts by agreeing actionable plans, owners, and target dates with technical teams, assessing completion evidence, and escalating material risks to management for timely resolution.
- Contributed to business continuity planning and application resilience testing, analysing operational data and incident findings to identify system dependencies and track agreed-upon improvements.
- Supported policy and procedure reviews, and contributed to risk awareness activities for emerging technologies within the trading environment.
- Managed an assigned portfolio of risk and control assessments, adapting to evolving priorities and business needs while maintaining clear communication with stakeholders.
- Refined risk workflows and reporting mechanisms by defining requirements for enhanced dashboards and evidence collection tools, validating changes to reduce repetitive work.

SKILLS

Risk & Controls – Technology Risk, Control Assessment, Risk Identification, Remediation, Audit Support, Policy Review, Risk Reporting, Key Risk Indicators

Technical Skills – Application Review, Infrastructure Assessment, Operational Processes, Change Management, Access Controls, Monitoring, Recovery, Technology Lifecycle

Data Analysis & Tools – Spreadsheets, Data Analysis, Reporting Tools, Automation, AI Tools, Splunk, Dynatrace, CloudWatch

Methodologies – Agile, Scrum, Risk Management Frameworks

Programming & Scripting – Python, Java, SQL

Cloud & Infrastructure – AWS, Linux, Docker

PROJECTS

Technology Control Framework Enhancement

- Designed and implemented an enhanced control framework for a suite of enterprise applications, including detailed documentation of control objectives, design considerations, and operational evidence requirements.
- Developed Python scripts to automate the aggregation of control evidence from various sources (logs, system reports), reducing manual collection time by approximately **40%** for quarterly reviews.
- Collaborated with application owners and the second-line Risk team to validate the new framework, ensuring alignment with regulatory expectations and internal policy.

Application Risk Assessment and Remediation

- Conducted comprehensive risk assessments for **5 critical applications** within the trading environment, evaluating potential business impacts and existing safeguards.
- Documented findings and proposed actionable remediation plans, including specific technical controls and process adjustments, to address identified vulnerabilities.
- Tracked the implementation of agreed-upon actions using Jira, providing regular status updates to stakeholders and verifying the effectiveness of completed remediation efforts.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
