PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained Python scripts to automate data ingestion and transformation processes for internal reporting, processing approximately 50 GB of data weekly.
- Designed and implemented Java Spring Boot REST APIs for inter-service communication, handling an average of 1,500 requests per minute.
- Managed production support for enterprise applications, focusing on incident response for P1/P2 issues and ensuring adherence to strict SLAs using Splunk and Dynatrace.
- Collaborated with cross-functional teams to define requirements and deliver features for a financial-services operations dashboard, supporting transaction monitoring and reconciliation workflows.
- Engineered data pipelines using SQL (PostgreSQL, Oracle) to support ERP system integrations and data validation across multiple enterprise platforms.
- Containerised Java applications using Docker for consistent deployment across development and staging environments, managing container lifecycles via Jenkins pipelines.
- Participated in Agile ceremonies including sprint planning and daily stand-ups, contributing to technical estimations and code reviews for a team of 8 engineers.

SKILLS

Programming Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, data modelling

Tools & Methodologies – Jira, Confluence, Agile, Scrum, REST APIs

PROJECTS

Enterprise Data Integration & Reporting Automation

- Automated weekly ETL processes using Python and SQL (PostgreSQL) to consolidate data from disparate ERP modules into a central data warehouse, reducing manual reporting effort by 40%.
- Developed a suite of Python scripts for data validation and anomaly detection within large datasets, identifying and flagging over 500 data inconsistencies per month.
- Built RESTful APIs with Java Spring Boot to expose curated datasets for downstream analytical consumption, supporting data access for business intelligence tools.

Financial Operations Dashboard Enhancement

- Contributed to the development of a payments operations dashboard, implementing Java code to parse and display transaction flow status for a financial services client.
- Designed and generated interactive Power BI dashboards to visualize key operational metrics for transaction monitoring and reconciliation workflows, enabling faster issue identification for the operations team.
- Wrote SQL queries to extract and aggregate data for operational reporting and audit trail generation, ensuring compliance with regulatory data retention policies.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
