PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented customer segmentation models using Python and scikit-learn on AWS SageMaker, achieving a 15% improvement in targeted campaign engagement for a financial services client.
- Developed and deployed predictive analytics models for customer lifetime value and churn prediction, impacting marketing strategy for retirement products and leading to a 10% reduction in customer attrition.
- Built and maintained analytical datasets and reusable Python code for marketing performance measurement, advisor engagement tracking, and customer lifecycle analysis across multiple product lines.
- Collaborated with marketing and distribution teams to define requirements and deliver analytical insights, translating complex model outputs into actionable strategies for business stakeholders.
- Contributed to the end-to-end data science initiative for a new customer acquisition campaign, balancing hands-on model development with oversight of project outcomes and quality assurance.
- Provided technical guidance and mentorship to junior team members on best practices for model development, validation, and deployment within a regulated financial services environment.
- Containerized analytical models and their supporting data pipelines using Docker and deployed them to an Azure Machine Learning environment, ensuring adherence to established engineering standards.

SKILLS

Programming – Python, SQL

Cloud Platforms – AWS (SageMaker), Azure (Azure Machine Learning)

Data Science & ML – Customer Segmentation, Propensity Modelling, Predictive Analytics, Feature Engineering, Model Deployment, Model Lifecycle Management, Experimentation, Uplift Modelling

BI & Visualization – Power BI, DAX, Power Query, Data Modelling

Financial Services Domain – Asset Management, Life Insurance, Retirement Products, Marketing Analytics, Distribution Analytics, Customer Targeting, Campaign Effectiveness

PROJECTS

Financial Services Customer Analytics Platform

- Developed a Python-based feature engineering pipeline to extract customer behavioral signals from transaction and product data, processing over 500,000 records weekly.
- Trained and evaluated a LightGBM classifier for predicting customer churn in the retirement services sector, achieving an AUC of 0.82 on a held-out dataset.
- Designed and implemented a suite of Power BI dashboards for marketing stakeholders to explore audience segments and analyze campaign performance, enhancing decision support.

Advisor Engagement & Distribution Model Optimization

- Built reusable Python scripts to analyze advisor engagement patterns and distribution channel effectiveness, supporting B2B and intermediary-led sales models.
- Integrated AI-driven lead scoring insights into existing reporting structures, providing business users with clearer interpretations of model outputs for sales prioritization.
- Collaborated with sales operations to refine targeting precision and improve customer engagement metrics through data-driven insights derived from analytical models.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
