PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Investigated and resolved complex application incidents across ERP systems, identifying root causes through analysis of front-end, back-end, databases, and APIs.
- Troubleshot integration failures by tracing transactions and data flows between ERP platforms, internal applications, and third-party systems using detailed log analysis.
- Analyzed application logs, error messages, and system traces to diagnose technical faults, pinpointing failures in transaction processing and system workflows.
- Investigated application performance issues, including identifying root causes for timeouts, latency, and database query inefficiencies impacting transaction success rates.
- Collaborated with development and technical teams to provide detailed findings and technical information for escalating complex application issues, facilitating timely resolution.
- Supported application improvements and system changes by providing technical insights and participating in UAT coordination for ongoing ERP-related projects.
- Containerised multiple Java Spring Boot services with Docker and deployed them to an AWS EKS cluster, managing Helm chart configurations and resource allocation.

SKILLS

ERP Systems – Infor M3, SAP, Microsoft Dynamics, Sage

Databases & SQL – SQL, PostgreSQL, MySQL, Oracle, Relational Databases, Querying, Data Analysis

APIs & Integrations – APIs, System Integrations, API Testing Tools, REST APIs, Integration Failures

Application Support & Troubleshooting – L2 Application Support, Technical Application Support, Root Cause Analysis, Log Analysis, Error Messages, System Traces, Performance Issues, Debugging

Cloud & DevOps – AWS, Docker, Kubernetes, Jenkins, CI/CD, Git

Scripting & Automation – Python, Shell Scripting

PROJECTS

ERP System Integration Support (HCL Technologies)

- Provided L2 application support for critical ERP integrations, focusing on troubleshooting data flow issues between enterprise systems and third-party platforms.
- Utilized SQL to analyze large datasets and identify master data discrepancies causing integration failures, implementing corrective scripts to resolve identified problems.
- Documented common integration failure patterns and contributed to the creation of runbooks for the support team, reducing average resolution time for integration issues by 15%.

Cross-System Transaction Monitoring Dashboard (HCL Technologies)

- Developed Python scripts to automate the aggregation of application logs and transaction data from disparate systems into a central monitoring dashboard.
- Designed and implemented REST APIs using Java Spring Boot to expose real-time transaction status for critical business processes, supporting operational alerting.
- Analyzed system performance metrics and database query execution times to identify bottlenecks affecting transaction throughput, recommending optimizations.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
