PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed production support for critical **Regulatory Reporting platforms**, ensuring application stability and performance across global environments.
- Investigated and resolved complex incidents and service interruptions within defined **SLA targets**, performing detailed root cause analysis.
- Supported batch processing schedules and critical data processing workflows, collaborating with business and technology teams to ensure timely execution.
- Developed and maintained **Python scripts** for automation of operational tasks and data validation, reducing manual effort by an estimated **15%**.
- Executed **SQL queries** and performed data validation for production issue triage and change management activities on **Oracle** and **PostgreSQL** databases.
- Contributed to service improvement initiatives by identifying opportunities for automation and process enhancements in production support workflows.
- Assisted in change and release management activities, coordinating deployments and providing post-implementation support for application updates.

SKILLS

Databases – Oracle, SQL Server, PostgreSQL, MySQL

Operating Systems – Linux, Windows

Monitoring & Logging – Splunk, Dynatrace, CloudWatch

Scripting & Automation – Python, Shell Scripting

ITSM Processes – Incident Management, Problem Management, Change Management, Release Management

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

PROJECTS

Financial Services Operations Dashboard Enhancement

- Enhanced a payments operations dashboard for a financial services client, focusing on improving **transaction monitoring** and alerting for failed payment messages.
- Developed **Python automation scripts** to streamline log analysis and incident data collection, reducing manual data gathering time by approximately **20%**.
- Collaborated with cross-functional operations teams to gather requirements for new dashboard features, directly supporting **business stakeholders** in their daily oversight activities.

Enterprise System Integration Automation

- Automated data reconciliation workflows between an ERP system and a core banking platform using **SQL** and **Python**, ensuring data consistency across systems.
- Implemented scheduled reporting jobs using **cron jobs** on Linux servers, delivering daily operational summaries to the business analysis team.
- Supported cross-system integrations via **REST APIs** and database-level data flows, contributing to the stability of interconnected enterprise systems.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
