PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided multilingual customer support in English and French, resolving complex technical issues for a major fintech client's payment processing platform.
- Researched and identified root causes for user-reported issues, acting as a primary point of contact and trust for customer inquiries via phone and email.
- Collaborated with operations teams to investigate transaction flows and monitor for anomalies, ensuring operational awareness for financial services clients.
- Documented troubleshooting steps and common issue resolutions, contributing to internal knowledge base and aiding in new team member onboarding.
- Managed multiple communication channels and customer support tickets simultaneously, adapting to new systems and workflows efficiently.
- Participated in regular internal training sessions focused on enhancing technical support skills, API understanding, and fraud detection techniques.
- Contributed to process improvement initiatives aimed at enhancing overall customer experience and operational efficiency within the support team.

SKILLS

Languages – English (Fluent), French (Fluent)

Customer Support – Technical Support, Problem Solving, Communication Skills, Customer Focus, Ticket Management, Escalation

Fintech & Payments – Payment Processing, Transaction Monitoring, Fraud Detection, Financial Services Operations

Technical Skills – APIs, Computer Literacy, Multiple Systems Navigation, Google Sheets

Professional Attributes – Self-Driven, Result-Oriented, Time Management, Adaptability, Continuous Learning

PROJECTS

Fintech Client Support & Process Enhancement

- Provided front-line technical support for a leading payment processing platform, investigating and resolving customer-reported issues related to transaction processing and user access.
- Developed and refined troubleshooting guides for common payment processing errors, which were adopted by the team and reduced average resolution time by 15% for specific issue types.
- Collaborated with internal business analysts to understand emerging customer pain points and suggest improvements to support workflows and documentation.

MSc Data Analytics - Customer Transaction Analysis

- Analyzed a large dataset of customer transactions using Python (pandas, NumPy) and SQL to identify patterns and potential areas for service improvement.
- Developed interactive Power BI dashboards to visualize transaction volumes, error rates, and customer segment behavior for academic review.
- Applied statistical methods to evaluate hypothetical changes in customer interaction, supporting the foundational understanding of data-driven decision-making.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021
