PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Installed, configured, and updated the **Ubuntu operating system** on Dell PowerEdge servers, preparing each machine in a known good state for platform engineers.
- Managed **Linux patch management**, including OS, BIOS, and iDRAC firmware updates, planning and executing maintenance windows with rollback strategies for individual servers.
- Configured and maintained **Prometheus and Grafana** for server, storage, and network observability, ensuring timely alerts for hardware faults and connectivity issues before customer impact.
- Triage hardware and OS errors using **iDRAC and server logs**, diagnosing issues such as failed disks, DIMMs, and PSUs, and coordinating with vendor support for part replacement.
- Performed day-to-day changes on **Dell network switches**, including VLAN configuration, trunk setup, and LACP, to support evolving infrastructure needs.
- Managed SAN storage changes, including LUN provisioning, iSCSI configuration, and multipath setup, ensuring consistent disk health and capacity.
- Assembled and cabled new servers in data centre racks, adhering to clean, labelled standards for both copper and fibre optics, and maintained accurate asset and rack diagrams.

SKILLS

Hardware – Dell PowerEdge servers, iDRAC, Lifecycle Controller, BIOS, firmware updates, SAN storage, LUNs, iSCSI, multipath, fibre optics

Operating Systems – Linux (Ubuntu, Debian), shell scripting, systemd, cron jobs

Networking – Dell switches, VLANs, trunks, LACP, port speeds, firewalls, port forwards

Observability – Prometheus, Grafana, Loki, ELK, Splunk, Dynatrace, logging, alerting

Tools – Racadm, Redfish API, Git, Jenkins, Jira, Confluence, AI-assisted development tools (Claude Code, Codex)

Methodology – Patch management, maintenance windows, rollback plans, methodical troubleshooting, change management, documentation, asset register

PROJECTS

Server Fleet Buildout and Standardization

- Executed the build and configuration of over **50 Dell PowerEdge servers** for a growing AI infrastructure platform, ensuring adherence to standardized OS installation and initial setup procedures.
- Implemented automated configuration management using basic shell scripts for common setup tasks, reducing manual configuration time per server by approximately **30%**.
- Developed and maintained comprehensive runbooks and rack diagrams, documenting hardware configurations, cabling standards, and initial setup steps for new deployments.

Production Server Monitoring and Alerting

- Established and managed a centralized monitoring system using **Prometheus and Grafana** to track key performance indicators and health metrics for the server estate.
- Configured granular alerting rules for hardware failures (disks, power supplies, fans) and OS-level issues, decreasing the average detection time for critical incidents by over **40%**.
- Performed root cause analysis on recurring alerts, documenting findings and implementing preventative measures to enhance overall system stability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
