PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented REST APIs using **Java Spring Boot** for seamless integration between enterprise systems, handling approximately 1,500 requests per minute during peak loads.
- Developed and maintained **Hibernate ORM** mappings and queries for a complex relational data model, ensuring data integrity and efficient transaction processing across multiple services.
- Authored comprehensive unit and integration tests using **JUnit** and **Mockito** for critical Java components, achieving over 85% code coverage for new feature development.
- Translated ambiguous business challenges into practical technical solutions by collaborating with customer stakeholders to define requirements for AI-enabled applications.
- Worked directly with business stakeholders and technical teams to understand requirements and deliver measurable outcomes for enterprise implementations.
- Built and deployed production-ready applications and AI-enabled solutions on **AWS**, integrating modern AI capabilities into complex enterprise technology environments.
- Containerized microservices using **Docker** and managed deployments to a **Kubernetes** cluster, configuring basic resource limits and health checks for reliable operation.

SKILLS

Languages – Java, Python, SQL, R, TypeScript

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI, Node.js, NestJS, LangChain

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

Databases – PostgreSQL, MySQL, Oracle, SQL

AI/ML – Generative AI, LLMs, AI-enabled solutions, Model Training, Inference, MLOps

Tools & Technologies – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau, RStudio, Linux, Shell Scripting

PROJECTS

Customer AI Solution Integration (HCL Technologies)

- Collaborated with an enterprise customer's data science team to integrate a custom LLM-based solution into their existing workflow, providing technical guidance and support.
- Developed Python scripts to process and format customer-specific data for ingestion into the AI model pipeline, ensuring compatibility and data quality for approximately 5,000 daily records.
- Designed and implemented a proof-of-concept RAG system using LangChain and a vector database to enhance the AI's knowledge base, demonstrating improved response accuracy in user testing.

Enterprise Application Performance Monitoring (HCL Technologies)

- Engineered Python automation scripts to extract and aggregate performance metrics from **Splunk** and **Dynatrace**, identifying key areas for application optimization.
- Developed a series of interactive dashboards in **Power BI** to visualize system health and operational status for a financial-services client, enabling faster incident triage.
- Supported production environments with strict SLAs, focusing on transaction monitoring and operational alerting for failed payment messages, contributing to a 15% reduction in critical alert response times.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
