PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Supervised automated trading systems for equities and FX markets during Asian trading hours, ensuring continuous operation for multiple trading teams.
- Assessed live trading activities for risk and compliance deviations, responding promptly to unusual market conditions and system behaviors.
- Collaborated with risk managers and trading teams to identify and escalate intraday trading issues, facilitating real-time problem resolution with core engineering, brokers, and exchanges.
- Developed and maintained comprehensive documentation for monitoring procedures and production issue logging, capturing critical details for incident analysis and resolution.
- Managed incident response for P1/P2 production issues on enterprise financial services applications, adhering to strict SLAs and coordinating with cross-functional operations teams.
- Automated repetitive data validation tasks and report generation using **Python scripting**, reducing manual effort by approximately **15%** for the financial operations team.
- Containerized Java Spring Boot microservices using **Docker** and deployed them to **AWS EC2** instances via Jenkins CI/CD pipelines, improving deployment consistency and reducing rollback frequency by **20%**.

SKILLS

Programming Languages – Java, Python, SQL, R, English

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Hibernate, JPA, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Databases – PostgreSQL, MySQL, Oracle

Tools & Platforms – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Domain Knowledge – Automated Trading Systems, Risk Management, Compliance, Equity Markets, Futures Markets, Options Markets, FX Markets, Transaction Monitoring, Reconciliation Workflows

PROJECTS

Production Monitoring and Incident Triage System

- Developed a **Python**-based application to aggregate alerts from **Splunk** and **Dynatrace** for critical financial services applications, enabling faster P1/P2 incident triage.
- Implemented automated data parsing and enrichment for incoming transaction messages, categorizing issues and reducing manual analysis time by **30%** for the support team.
- Designed REST APIs using **Flask** to expose system health metrics and incident summaries to an internal operations dashboard.

Data Analytics Dashboard for Transaction Reconciliation

- Built interactive **Power BI** dashboards to visualize transaction reconciliation workflows and highlight discrepancies for an enterprise client, supporting a team of 5 analysts.
- Engineered **ETL** processes using **SQL** and **Power Query** to extract, transform, and load data from PostgreSQL and Oracle databases into a data model for reporting.
- Created custom **DAX** measures to calculate key performance indicators related to reconciliation success rates and identify root causes of failures, improving visibility into operational bottlenecks.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
