PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed the IT infrastructure for a large academic department, overseeing Windows-based workstations, specialized geoscience software, and secure network operations.
- Provided expert support for geophysical, geospatial, and geomodelling software, ensuring seamless operation for research teams and students.
- Administered the school's dedicated servers, including storage, off-site backup facilities, and firewall management, to maintain data integrity and security.
- Supported the delivery of two MSc programmes and a BSc in Earth Sciences, including training students on system management and security best practices.
- Collaborated with UCD IT Services and industry research partners to facilitate access to hardware, software, and maintain strategic IT infrastructure.
- Oversaw classroom audio-visual and video-capture equipment, ensuring functionality for lectures and remote learning initiatives.
- Containerized and deployed a Python-based data processing script for a research group using Docker and Jenkins, improving deployment consistency across development and staging environments.

SKILLS

Operating Systems – Windows Server, Linux, Windows Workstations

Networking & Security – Firewall Management, Network Administration, Cybersecurity, Secure Network Architecture

Software & Systems Administration – Server Management, Storage Management, Backup Solutions, HPC Management, Geoscience Software, 3D Interpretation Software

IT Support & Operations – Incident Response, SLA Management, Procurement Processes, Classroom AV, Video Capture Equipment

Scripting & Automation – Python, Shell Scripting

Cloud & Virtualization – AWS, Docker, Virtual Machines

PROJECTS

Academic Research Network and Server Infrastructure

- Designed and implemented a secure, segmented network architecture for a university research department, accommodating specialized geoscience applications and HPC clusters.
- Managed dedicated Linux servers for data storage and off-site backups, implementing automated backup routines and access controls to ensure data resilience.
- Configured and maintained firewall rules and access policies, collaborating with central IT services to ensure compliance with organizational security standards.

Geoscience Software Deployment and Support Automation

- Developed Python scripts to automate the installation and configuration of licensed geoscience software packages across Windows workstations, reducing manual deployment time by 40%.
- Created a Docker image for a custom data processing pipeline used by a research team, enabling consistent execution across different environments and simplifying dependency management.
- Documented deployment procedures and common troubleshooting steps for specialized software, contributing to a knowledge base that reduced support ticket volume by 15% for those issues.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
