PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and enhanced site **OEE dashboards**, integrating real-time production data collection to provide actionable insights into manufacturing performance for operational teams.
- Automated **KPI reporting** processes using Python scripting, reducing manual reporting efforts by an estimated **15 hours per week** and improving data accuracy.
- Categorised and analysed **equipment downtime** events, identifying key trends and contributing to root-cause investigations for corrective actions that reduced unplanned stoppages by **8%**.
- Designed and implemented **Power BI dashboards** to visualise manufacturing KPIs, enabling data-driven decision-making and identifying performance losses and production bottlenecks.
- Supported process mapping and standardisation initiatives, contributing to waste reduction efforts by documenting workflows and identifying areas for efficiency improvements.
- Tracked project tasks, actions, and deliverables for Operational Excellence projects using **Jira**, ensuring timely completion and effective stakeholder communication.
- Containerised data collection and reporting services using **Docker**, deploying them to an **AWS EC2** instance for improved scalability and reliability in the manufacturing environment.

SKILLS

BI & Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling, Data Warehousing, Business Intelligence

Programming & Scripting – Python, Java, SQL, R, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Manufacturing & Operations – OEE, KPI Reporting, Process Mapping, Waste Reduction, Root Cause Analysis, Lean Principles

Databases & Systems – PostgreSQL, MySQL, Oracle, ERP Systems, REST APIs

Tools & Methodologies – Jira, Confluence, Agile, Scrum

PROJECTS

Manufacturing Performance Dashboard Development

- Developed a comprehensive **Power BI dashboard** to monitor Overall Equipment Effectiveness (OEE) and key manufacturing KPIs, consolidating data from various production systems.
- Automated data extraction and transformation pipelines using **Python** and **SQL** to feed the dashboard, reducing manual data compilation time by approximately **10 hours per week**.
- Collaborated with operations stakeholders to define reporting requirements and present findings, leading to the identification of critical downtime causes and a **5% improvement** in asset utilisation.

Equipment Downtime Analysis & Automation

- Engineered a Python script to parse and categorise raw equipment logs, enabling systematic analysis of downtime causes and frequencies.
- Built automated alerts using **AWS Lambda** and **CloudWatch** to notify maintenance teams of recurring or extended equipment stoppages in near real-time.
- Analysed historical downtime data, identifying that **40%** of unplanned stoppages were related to specific component failures, informing preventative maintenance schedules.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
