PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Acted as the primary technical point of contact for enterprise customers, gathering requirements for network security and physical security deployments, and translating them into actionable Verkada solution designs.
- Designed and documented complex Verkada system integrations for Fortune 500 clients, focusing on network bandwidth calculations, VLAN configurations, and HTTPS/SSL integration strategies.
- Provided technical assistance and training to account executives and local partners on the full Verkada suite, ensuring effective articulation of value-added benefits during the sales process.
- Developed comprehensive technical white papers and knowledge base articles detailing Verkada product features, deployment best practices, and integration capabilities for internal and external audiences.
- Managed production environments for enterprise applications, ensuring adherence to strict SLAs and performing incident response for P1/P2 issues, ultimately reducing critical incidents by **15%**.
- Automated data extraction and reporting tasks using **Python scripting**, generating weekly operational summaries that improved data availability for business analysts by **20%**.
- Containerized Java Spring Boot microservices using **Docker** and deployed them to **AWS EC2** instances, establishing basic CI/CD pipelines with **Jenkins** for consistent code deployments.

SKILLS

Cloud Security – Cloud Security RFP's, LTE deployments, AWS

IoT Systems – Verkada Products, Device Deployment Design

Networking – HTTPS/SSL, VLANs, TCP/IP, DNS, Firewalls, NAT devices, DHCP servers, Network Security

Linux Systems – Linux, Shell Scripting, Log Analysis

Security Surveillance – Video Security, Access Control, Alarms, Intercoms

Programming Languages – Python, Java, SQL

Development Tools – Spring Boot, Docker, Jenkins, Git, Jira, Confluence, REST APIs

PROJECTS

Enterprise IoT Solution Design for Enhanced Physical Security

- Designed and architected integrated Verkada solutions for large enterprise clients, encompassing video security, access control, and alarm systems, addressing specific physical security challenges.
- Developed detailed network requirement specifications, including bandwidth estimations and firewall rule configurations, to ensure seamless and secure operation of Verkada devices across diverse customer networks.
- Created technical documentation and deployment guides for multi-site rollouts, facilitating efficient installation and configuration for customer IT teams and on-site technicians.

Automated Production Monitoring and Alerting System

- Developed a **Python**-based system to ingest logs from **Splunk** and **CloudWatch**, parse critical alerts, and trigger automated notifications, reducing manual monitoring effort by **30%**.
- Implemented REST APIs using **Java Spring Boot** to integrate with existing enterprise systems, enabling real-time data flow for operational dashboards and incident tracking.
- Managed the deployment and configuration of the monitoring system on **AWS EC2** instances, ensuring high availability and performance for critical production services.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
