PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **MES systems projects**, including structured handover and post-implementation support, ensuring business benefits realization for a key manufacturing workflow.
- Analyzed and improved **manufacturing process outputs** by collecting and summarizing information and trends, leading to a 15% reduction in cycle time for a critical production line.
- Developed and delivered **technical training** on new system implementations and process optimizations to cross-functional teams, enhancing operational efficiency and user adoption.
- Collected, analyzed, and summarized information and trends to prepare **product and process reports**, identifying root causes for quality deviations and proposing corrective actions.
- Specified, designed, and implemented **electronic batch records**, improving data integrity and streamlining the batch production process for a specific product family.
- Provided **qualification and validation support** for new system deployments and process changes, ensuring compliance with regulatory standards and internal quality guidelines.
- Containerized **Java Spring Boot applications** using Docker and deployed them to an AWS EC2 environment managed via Jenkins CI/CD pipelines, reducing deployment time by 40%.

SKILLS

Manufacturing Systems – MES, SAP, LIMS, Manufacturing Processes, Validation, Automation, Quality, Project Management

Programming Languages – Java, Python, SQL

Cloud & Containerization – AWS (EC2, S3, Lambda), Docker

Development Tools – Spring Boot, Jenkins, Git, Jira, Confluence

Databases – PostgreSQL, MySQL, Oracle

Analytics & Reporting – Power BI, Tableau, R, pandas, scikit-learn, DAX, Power Query

Compliance & Standards – 21 CFR Parts 210/211, ISPE/ICH Guidelines, EudraLex

PROJECTS

Manufacturing Execution System (MES) Implementation

- Designed and configured an **MES system** to track and manage production processes for a new product line, integrating with existing **SAP** modules for material flow.
- Developed Python scripts to automate data extraction from MES logs for **performance reporting**, identifying bottlenecks and areas for process optimization.
- Provided hands-on **technical training** to manufacturing floor personnel on utilizing the MES for real-time data entry and process monitoring.

Automated Production Reporting with Power BI

- Built an end-to-end solution for collecting manufacturing data from various sources and transforming it using **Power Query** for analysis.
- Developed interactive **Power BI dashboards** to visualize key manufacturing metrics, including cycle times, yield rates, and quality deviations, presenting findings to stakeholders.
- Implemented custom **DAX measures** to provide deeper insights into process efficiency and identify trends impacting product quality.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
