PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Facilitated business interviews and workshops with senior stakeholders to elicit and validate requirements for operational process redesigns, contributing to a **15% improvement** in process efficiency.
- Mapped end-to-end operational processes using **MS Visio** and identified key automation and AI opportunities, leading to the proposal of **4 distinct solution options** with associated benefit analysis.
- Redesigned fragmented manual processes into standardised, automation-ready operating models, clearly delineating deterministic steps from AI-enabled interpretation points.
- Applied **generative AI assistants** to accelerate requirements capture and documentation for a new operational workflow, validating outputs for accuracy and confidentiality before stakeholder review.
- Designed and built **low-fidelity wireframes** using **PowerPoint** to visualise proposed process changes and gather early feedback from business and technical stakeholders.
- Supported quality assurance efforts through detailed **test planning, creation, and execution**, ensuring alignment between redesigned processes and business objectives.
- Managed and coordinated multiple phases of a moderate-sized project, tracking progress against schedule and proactively identifying and mitigating risks to ensure smooth transition to business-as-usual operations.

SKILLS

Business Analysis – Structured problem solving, Process mapping, Requirements elicitation, Business case development, Lean process improvement, Design thinking, User-centred design, UX principles

AI & Automation – Generative AI, AI-assisted workflows, Intelligent automation, Low-code/no-code platforms, Power Automate, AI governance, Responsible AI, LLM concepts

Prototyping & Design – Wireframing, Mock-ups, Interactive prototypes, Figma, Balsamiq, Miro, PowerPoint

Data Analytics – Data analysis, Cost-benefit analysis, Statistical analysis, Performance metrics, MS Visio

Project Management – Agile methodologies, Waterfall methodologies, Stakeholder engagement, Risk mitigation, Test planning, Test execution, Change management

PROJECTS

Operational Process Automation Initiative (HCL Technologies)

- Analyzed and mapped existing manual transaction processing workflows for a financial services client, identifying bottlenecks and areas for AI-driven automation.
- Designed a redesigned process flow incorporating **intelligent automation** and human judgement points, utilizing **Power BI** to model potential efficiency gains of approximately **20%**.
- Developed **low-fidelity prototypes** and facilitated UAT sessions with operations teams to validate the redesigned process and gather feedback for iterative improvements.

AI-Assisted Requirements Capture Tool (HCL Technologies)

- Developed a Python script to automate the initial extraction of keywords and entities from stakeholder interview transcripts, reducing manual analysis time by **~30%**.
- Integrated **generative AI** capabilities to summarize extracted information and draft initial requirement statements, significantly accelerating the documentation phase for a new feature.
- Implemented basic validation checks on generated requirements to ensure consistency and adherence to project standards, supporting a more structured approach to backlog grooming.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
