PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Performed security-focused code reviews for new features in **Python** and **JavaScript** web applications, identifying and documenting over 30 potential vulnerabilities before production deployment.
- Partnered with product and engineering teams to conduct threat modeling for upcoming feature releases, proactively identifying security risks in the **application architecture**.
- Investigated and triaged incoming security vulnerability reports from internal teams and the bug bounty program, providing detailed reproduction steps and initial impact assessments.
- Assisted in the preparation and rollout of security patches and releases, coordinating with development teams to ensure timely remediation and minimize disruption.
- Developed reusable security patterns and **automated tooling** in **Python** to detect common vulnerability classes, reducing manual review time by approximately **15%**.
- Contributed to the design and implementation of secure coding guidelines and best practices, participating in bi-weekly security guild meetings to share knowledge across engineering teams.
- Containerized security scanning tools using **Docker** and integrated them into CI/CD pipelines for automated security checks on code commits.

SKILLS

Languages – Python, JavaScript, Java, SQL, R

Web Technologies – REST APIs, Spring Boot, Node.js, NestJS, React, Angular

Security Concepts – Application Security, Threat Modeling, Vulnerability Assessment, Code Review, Bug Bounty

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools & Platforms – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

PROJECTS

Secure Authentication Service Development

- Designed and implemented a secure authentication service using **Python (FastAPI)** and **PostgreSQL**, focusing on robust user credential management and session security.
- Integrated JWT-based authentication into a microservices architecture, ensuring secure data exchange between services and protecting sensitive API endpoints.
- Wrote comprehensive unit and integration tests using **pytest**, achieving over **90%** code coverage for critical authentication and authorization logic.

Web Application Security Review Framework

- Developed a Python-based framework to automate common security checks for web applications, including checks for SQL injection and cross-site scripting vulnerabilities.
- Created a set of reusable security patterns and documented best practices for developers to integrate into their workflow, aiming to prevent common security flaws.
- Collaborated with a small team to pilot the framework on internal staging applications, identifying and helping to remediate **12 high-severity issues** prior to production.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
