HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** REST APIs for system integrations, reducing data latency by **18%** for downstream reporting.
- Developed and maintained **Hibernate** ORM mappings and JPQL queries to efficiently manage persistence for core enterprise data models.
- Wrote comprehensive unit and integration tests using **JUnit** and **Mockito**, increasing code coverage for critical modules by **30%**.
- Contributed to the design and implementation of a new **data centre site selection tool**, translating stakeholder requirements into actionable engineering tasks.
- Participated in **agile sprint planning** and technical estimation sessions, ensuring accurate delivery timelines for project milestones.
- Collaborated with senior engineers on **code reviews**, identifying potential performance bottlenecks and adherence to coding standards.
- Containerized Java applications using **Docker** and deployed them to **AWS EC2** instances, improving environment consistency and deployment speed.

SKILLS

Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, JUnit, Mockito, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Tools & Platforms – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

Methodologies – Agile, Scrum

PROJECTS

Java Application Performance Monitoring Service

- Developed a **Java Spring Boot** microservice to collect and aggregate application metrics from distributed systems, feeding into a central observability platform.
- Integrated custom instrumentation points using **Hibernate** query interceptors to profile database access patterns and identify slow-performing queries.
- Implemented REST endpoints for real-time metric retrieval, supporting a **30% reduction** in average incident resolution time for monitored applications.

Data Centre Infrastructure Site Selection Tool

- Built a **Python**-based data ingestion pipeline to process geographical and environmental data for potential data centre locations.
- Designed and developed a user interface using **Flask** and basic HTML/CSS to allow stakeholders to input criteria and visualize site suitability scores.
- Stored processed site data in a **PostgreSQL** database, enabling efficient querying and reporting for the engineering team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
