PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed stock allocation from **Primeline** to 36 retail stores based on real-time sales data, ensuring optimal inventory levels and minimizing overstock situations.
- Reviewed and analysed stock availability across all stores and distribution centres, identifying products requiring replenishment orders from suppliers and flagging potential stock-outs.
- Assessed and updated **planograms** to align product facings and capacity with sales performance, optimising shelf space utilisation and product visibility.
- Identified and flagged slow-selling products across the retail network, initiating reviews for potential markdowns or promotional strategies to improve turnover.
- Monitored and reported on out-of-stock items in near real-time, collaborating with logistics and merchandising teams to expedite replenishment and restore availability.
- Tracked overdue supplier orders, highlighting those that posed a significant risk to store inventory levels and proactively communicating potential impacts to regional managers.
- Developed and maintained detailed inventory reports using **Excel** and internal systems, providing actionable insights to the merchandising team for strategic decision-making.

SKILLS

Inventory Management – Stock Allocation, Replenishment, Planogram Analysis, Stock Availability Monitoring, Order Tracking, Slow-Moving Product Identification, Out-of-Stock Monitoring

Retail Operations – Store Allocation, Sales Data Analysis, Shelf Space Optimisation, Merchandising, Supply Chain Coordination

Data Analysis & Reporting – Excel, Data Interpretation, Reporting, Business Insights, Trend Analysis

Tools & Systems – Primeline, ERP Systems (Conceptual), POS Data Analysis (Conceptual)

Soft Skills – Analytical Skills, Attention to Detail, Organization, Prioritisation, Relationship Building, Communication

PROJECTS

Retail Stock Optimisation Initiative (HCL Technologies)

- Developed Python scripts to automate the analysis of sales data from multiple retail channels, identifying patterns for improved stock allocation.
- Built a reporting dashboard in **Power BI** to visualise stock levels, sales velocity, and potential stock-out risks for over 500 SKUs across 25 stores.
- Collaborated with the operations team to refine reorder point calculations, reducing instances of critical stock-outs by an estimated **15%** over a 3-month pilot period.

Merchandising Performance Analysis (MSc Data Analytics)

- Conducted in-depth analysis of merchandising data using **R** and **pandas** to identify key drivers of product performance and customer purchasing behaviour.
- Created interactive **Tableau** dashboards to present findings on product placement and sales trends to academic stakeholders, highlighting areas for improved visual merchandising.
- Performed statistical analysis, including regression modelling, to understand the correlation between planogram complexity and sales volume for selected product categories.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
