HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed and enhanced **Java Spring Boot** microservices, developing **REST APIs** for cross-service communication and implementing **JPA** for data persistence against a PostgreSQL backend.
- Designed and implemented a robust data pipeline using **Python** and **pandas** to ingest, transform, and load data from disparate sources into a data warehouse, improving data availability for downstream analytics.
- Oversaw the production support for enterprise applications, focusing on **SLA management** and **P1/P2 incident response** leveraging tools like **Splunk** and **Dynatrace** to ensure operational stability.
- Led the analysis and remediation of complex security vulnerabilities and exposures across a large technology environment, coordinating efforts between security, technology, and business teams to reduce cyber risk.
- Developed and maintained **security monitoring** and **incident detection** playbooks, defining clear procedures for triage, containment, and escalation of security events.
- Utilized security intelligence, tooling, and telemetry data to identify material threats, assess risks, and prioritize remediation actions for senior management reporting.
- Containerized applications using **Docker** and managed deployments on **AWS EC2** instances, ensuring consistent environments and facilitating efficient release cycles.

SKILLS

Security Operations – Security Monitoring, Incident Response, Threat Intelligence, Vulnerability Management, Attack Surface Management, Control Assurance

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Active Directory

Programming Languages – Java, Python, SQL, R

Frameworks & Tools – Spring Boot, JPA, pandas, Flask, FastAPI, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

Data & Analytics – Data Warehousing, ETL, Data Modelling, DAX, Power Query, Statistical Analysis

Methodologies – Agile, Scrum, Change Management, CI/CD

PROJECTS

Enterprise Application Security Hardening

- Implemented security controls and hardening measures for a critical Java-based enterprise application, reducing identified vulnerabilities by **45%** over a six-month period.
- Developed automated scripts using **Python** to scan for and report on common security misconfigurations across **AWS** infrastructure, streamlining the vulnerability assessment process.
- Collaborated with cross-functional teams to integrate security best practices into the CI/CD pipeline, including code reviews and automated security testing triggers.

Financial Transactions Monitoring Dashboard

- Built a **Power BI** dashboard to visualize and monitor key metrics for financial transaction flows, providing operational teams with real-time insights into processing status and potential issues.
- Designed and implemented **SQL** queries against PostgreSQL to extract and aggregate transaction data, supporting reconciliation workflows and audit trail requirements.
- Created data models within Power BI to support complex reporting needs, enabling stakeholders to perform ad-hoc analysis on transaction volumes and success rates.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
