HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and built asynchronous workflows and microservices across AWS regions to manage network connectivity data, processing approximately **5,000 events per second** during peak hours.
- Developed data pipelines using **Python** and **SQL** to analyze network traffic patterns, identifying degraded customer connections and generating alerts for operational teams.
- Automated the detection and resolution of customer-impacting network issues by building monitoring services that correlate events across distributed systems.
- Collaborated with network engineers to automate manual operational tasks, integrating **AI-assisted development** approaches for ticket resolution and system health checks.
- Wrote and reviewed detailed **design documents** for new service features, mentoring junior engineers through code reviews and design sessions.
- Troubleshot and performed root cause analysis on customer-impacting issues, driving corrective actions to completion through deep-dive investigations.
- Containerized microservices using **Docker** and deployed them to **AWS ECS**, configuring basic resource limits and health checks for predictable performance.

SKILLS

Cloud Platform – AWS, EC2, S3, Lambda, CloudWatch, AWS ECS

Programming Languages – Java, Spring Boot, Python, SQL, JavaScript

Databases – PostgreSQL, MySQL, Oracle

DevOps & CI/CD – Docker, Jenkins, Git, Jira, Confluence

Data & AI – Data Pipelines, ETL, AI-assisted development, Network Traffic Analysis

Core Engineering – REST APIs, Microservices, Asynchronous Workflows, Design Documents, Code Reviews

PROJECTS

AWS Direct Connect Customer Impact Analysis

- Developed a **Python** data pipeline to ingest and process network telemetry data from various AWS services, analyzing traffic flow for over **1,500 enterprise customer connections**.
- Built a **Java Spring Boot** microservice to detect and flag degraded network performance impacting customers, integrating with **AWS CloudWatch** for real-time monitoring.
- Created operational dashboards in **Splunk** to visualize network health trends and customer impact during network events, reducing manual reporting time by **~40%**.

Automated Network Event Response System

- Designed an asynchronous workflow using **Python** and **AWS Lambda** to automate the initial triage and alerting for network incidents affecting enterprise clients.
- Implemented REST APIs for system integration, allowing network engineering teams to query impact status and trigger automated remediation actions.
- Contributed to the design of an **AI agent** framework for prioritizing and assigning operational tickets based on customer impact severity and network event data.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
