PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Established and executed a comprehensive **software-testing framework** for retail systems, defining **test plans**, **acceptance criteria**, and documenting results for POS and ERP platforms.
- Validated **POS and SumUp transaction workflows**, including sales, refunds, discounts, and end-of-day reconciliation, ensuring data accuracy across varied transaction types.
- Tested the distribution and validation of **product records, barcodes, and pricing changes** from central operations to store-level systems, maintaining consistency across three locations.
- Performed **integration and end-to-end testing** between POS, SumUp, ERP, and inventory systems, identifying and rectifying issues with transaction processing and data exchange.
- Validated **SSIS data-integration packages** responsible for consolidating store data, including testing data transformations, scheduled processing, and error handling for failed loads.
- Tested **Power BI dashboards and SSRS reports**, verifying calculations for sales, product performance, and stock movements against underlying source data to ensure reporting accuracy.
- Managed and maintained **retail and reporting databases**, including writing and optimising **SQL queries**, views, and scheduled jobs, ensuring data integrity and security.

SKILLS

Testing Frameworks – Test Plans, Acceptance Criteria, Regression Testing, User Acceptance Testing

Retail Systems – POS, ERP, Inventory Management, Stock Control, SumUp, Pricing Functionality, Deli Sales

Data Management – SQL, Database Maintenance, Data Integrity, Data Structures, Scheduled Jobs, Data Validation

Data Integration – SSIS, ETL, Data Transformations, API Integration

Reporting & BI – Power BI, SSRS Reports, Data Visualisation

Core Technologies – Java, Spring Boot, Python, PostgreSQL, AWS, Docker, Linux, Git, Jenkins

PROJECTS

Retail Systems Integration and Testing Framework

- Developed a detailed **test plan** and **acceptance criteria** for core retail operations, covering POS, inventory, and reporting systems across multiple store locations.
- Executed integration tests between the **ERP and POS systems**, verifying the accurate flow of sales data, product updates, and stock adjustments, identifying and documenting 15 critical defects.
- Created **SQL scripts** to validate data consistency between central databases and store-level records for product pricing and inventory levels, ensuring adherence to operational standards.

Data Validation and Reporting for Retail Operations

- Built automated **data validation checks** using **Python** to ensure accuracy of transaction data exported from POS systems before loading into central databases.
- Designed and tested **Power BI reports** that visualise store sales performance, stock movements, and wastage metrics, enabling management to track key operational KPIs.
- Wrote **SQL queries** to extract and aggregate data for end-of-day reconciliation reports, identifying discrepancies in payment processing and refunds for further investigation.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
