PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Defined and executed comprehensive test plans, including functional, regression, and end-to-end testing, for core policy administration and pensions platforms.
- Managed and tracked complex defects through their lifecycle, collaborating closely with Business Analysts and developers to mitigate delivery risks and ensure software quality.
- Established and maintained robust test environments, ensuring readiness for various testing phases and supporting seamless execution of test suites.
- Developed Python scripts to automate data validation and reporting tasks, reducing manual effort by approximately 40% and improving data accuracy for financial operations.
- Contributed to the development and maintenance of Java Spring Boot REST APIs, implementing new features and resolving bugs in production enterprise applications.
- Supported and integrated with enterprise business systems, coordinating change control management for system updates and facilitating User Acceptance Testing (UAT) across interconnected platforms.
- Containerized applications using **Docker** and deployed them to **AWS EC2** instances, enhancing deployment consistency and operational efficiency across development and production environments.

SKILLS

Core QA – Quality Assurance, Test Strategy, Test Planning, Functional Testing, Regression Testing, End-to-End Testing, Defect Management, UAT

Insurance Domain – Life Insurance, Pensions, Policy Administration, Claims Systems, Financial Services

Legacy Systems – Life400, AS400, IBM Mainframe Architecture

Backend Development – Java, Spring Boot, REST APIs, Python Scripting, ETL

Databases & Data – SQL, PostgreSQL, MySQL, Oracle, Data Validation, Data Warehousing

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

PROJECTS

Core System Modernisation QA Strategy

- Developed a comprehensive QA strategy for a core system modernisation programme focused on the Life400/AS400 platform, outlining testing phases from requirements to release.
- Authored detailed test scenarios and cases for policy administration and pensions modules, ensuring alignment with business requirements and regulatory compliance.
- Collaborated with development teams to establish integrated test environments, facilitating early detection of defects and reducing post-release issues by an estimated 30%.

Automated Financial Operations Reporting

- Engineered a Python-based automated reporting solution for financial operations, processing transaction data from multiple SQL databases (PostgreSQL, Oracle) to generate daily reconciliation summaries.
- Implemented data validation checks within the Python scripts to ensure accuracy and consistency of the generated reports, flagging discrepancies for immediate review.
- Scheduled and monitored the execution of automated reports using Linux cron jobs, ensuring timely delivery of critical operational insights to business stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
