HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered **functional test scenarios** and comprehensive **regression suites** for core policy administration and claims platforms, identifying and tracing complex defects to resolution.
- Established and validated **core data flows** across legacy mainframe systems, ensuring data integrity and consistency for critical business operations.
- Provided **actionable risk assessments** and clear, executive-facing quality updates to project stakeholders, directly influencing release cycle de-risking.
- Developed **Python scripts** to automate data validation checks and generate scheduled reports for operational monitoring, reducing manual effort by approximately **15%**.
- Managed **production incidents** for enterprise applications using **Splunk** and **Dynatrace**, adhering to strict SLAs and performing root cause analysis for P1/P2 issues.
- Contributed to the development of **Java Spring Boot** REST APIs for cross-service data exchange, implementing request validation and circuit-breaker patterns.
- Containerized **Java applications** using **Docker** and deployed them to **AWS EC2** instances, managing configurations and basic resource limits for predictable rollouts.

SKILLS

Testing – Functional Testing, Regression Testing, Defect Management, Test Scenarios, Quality Assurance

Core Systems – Life400, AS400, IBM Mainframe, Policy Administration, Claims Platforms, Pensions Platforms

Programming Languages – Java, Python, SQL

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Monitoring & Support – Splunk, Dynatrace, P1/P2 Incident Response, SLA Management

PROJECTS

Test Automation Framework for Policy Administration Systems

- Designed and implemented an automated testing framework using **Python** to execute functional and regression tests against core policy administration modules.
- Integrated the framework with **Jenkins** for continuous integration, enabling automated test runs on code commits and reducing manual testing cycles by an estimated **40%**.
- Developed detailed test scripts and validation checks for data flows between policy administration and downstream claims processing systems, ensuring data consistency.

Production Support Dashboard for Financial Operations

- Developed a **Java Spring Boot** application that aggregated operational metrics and alerts from **Splunk** for a financial services client's payments dashboard.
- Implemented RESTful APIs to feed real-time transaction monitoring data into the dashboard, providing operations teams with immediate visibility into failed payment messages.
- Collaborated with business analysts to define key performance indicators and reporting requirements for operational alerting and reconciliation workflows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
