PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Gathered and documented technical and business requirements for infrastructure upgrades and cloud environment initiatives, translating complex engineering specifications into clear user stories and acceptance criteria for a financial services client.
- Facilitated workshops with cross-functional teams including Infrastructure Engineers, Security Engineers, and Architects to define current-state and future-state processes, identifying project dependencies and technical constraints.
- Supported technology remediation projects by performing gap analysis and documenting process flows, working closely with third-party technology partners to ensure seamless integration and handover.
- Managed change control processes for system configuration updates and coordinated User Acceptance Testing (UAT) across interconnected enterprise business systems, ensuring compliance with IT governance and regulatory requirements.
- Developed Python scripts to automate data validation and reporting tasks for operational dashboards, streamlining data extraction and preparation for business analysts.
- Contributed to the development of Java Spring Boot REST APIs for cross-service data exchange, implementing request validation and error handling patterns within production environments.
- Containerized Java applications using **Docker** and deployed them to **AWS EC2** instances via Jenkins pipelines, managing basic resource configurations and monitoring application health with **Splunk**.

SKILLS

Business Analysis – Requirements Gathering, Process Mapping, Stakeholder Management, Gap Analysis, User Stories, Acceptance Criteria, Workshops, UAT

IT Infrastructure – Networks, Servers, Cloud Infrastructure, Identity & Access Management, Security Controls, Vulnerability Management, Infrastructure Security

Software Development – Java, Spring Boot, REST APIs, Python, Scripting, Docker, Git, Jenkins

Data & Reporting – SQL, PostgreSQL, MySQL, Oracle, Data Validation, ETL, Splunk, CloudWatch

Methodologies – Agile, Waterfall, Scrum, Change Management, Governance & Regulatory Compliance

Tools – Jira, Confluence, Visio, Dynatrace

PROJECTS

Infrastructure Modernisation Initiative (HCL Technologies)

- Documented requirements for a cloud migration project, detailing current-state infrastructure and future-state architecture for a major enterprise client, facilitating workshops with network and security teams.
- Developed Python scripts to automate the generation of infrastructure inventory reports from disparate data sources, improving data accuracy for compliance audits by approximately 15%.
- Mapped out existing server configurations and security control implementations using **Visio**, identifying critical gaps against new cybersecurity framework requirements.

Financial Operations Dashboard Enhancement (HCL Technologies)

- Collaborated with business analysts to refine requirements for transaction monitoring features on a financial operations dashboard, translating needs into technical specifications for Java backend development.
- Implemented enhancements to Java Spring Boot services that processed and flagged failed payment messages, improving the dashboard's real-time alerting capabilities.
- Wrote **SQL** queries against **PostgreSQL** to validate data integrity and support ad-hoc reporting for reconciliation workflows within the payments processing environment.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
