# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Designed and implemented **RESTful APIs** in **Java Spring Boot** for inter-service communication, handling approximately **1,500 requests per minute**.
- Developed **Python scripts** to automate ETL processes for data ingestion into a **PostgreSQL** data warehouse, reducing manual processing time by **30%**.
- Managed production incidents for enterprise applications on **AWS** using **Splunk** and **Dynatrace**, achieving SLA targets through effective root cause analysis and timely resolution.
- Engineered event-driven microservices using **Go**, focusing on asynchronous communication patterns with message queues to build a scalable backend.
- Integrated **gRPC** interfaces for high-performance inter-service communication, ensuring efficient data exchange within a distributed system architecture.
- Implemented comprehensive unit and integration tests for **Go** services, maintaining a code coverage rate of over **85%** to ensure software reliability.
- Containerized backend services using **Docker** and orchestrated deployments on a **Kubernetes** cluster, enabling streamlined CI/CD pipelines and scalable infrastructure management.

## SKILLS

**Languages** – Go, Java, Python, SQL, Bash

**Frameworks/Libraries** – Spring Boot, gRPC, Docker, Kubernetes, FastAPI, Flask

**Cloud Platforms** – AWS (EC2, S3, Lambda, CloudWatch)

**Databases** – PostgreSQL, MySQL, Oracle

**Tools/DevOps** – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Linux

## PROJECTS

### Scalable Go Backend for Event Processing

- Developed a distributed backend system in **Go** designed to process high-volume event streams, ingesting data from multiple sources.
- Implemented asynchronous message handling using a **Kafka** integration, ensuring reliable data processing and decoupling of services.
- Containerized the entire application stack with **Docker** and deployed to a **Kubernetes** cluster, enabling auto-scaling and fault tolerance.

### API Gateway and Service Orchestration

- Built a centralized **API Gateway** using **Go** to manage external requests and route them to various microservices.
- Implemented **RESTful API** endpoints for core business logic, ensuring secure and efficient data retrieval and manipulation.
- Integrated with a **PostgreSQL** database for persistent storage of application data, designing efficient schemas and queries.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
