PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Salesforce Lightning** components and workflows to translate business requirements into scalable platform solutions for enterprise-wide adoption.
- Managed end-to-end delivery of **Salesforce platform** enhancements across multiple new entities during M&A; integrations, ensuring seamless data migration and user onboarding.
- Collaborated with global, cross-functional teams to define requirements and deliver new **Salesforce** features, integrating with existing enterprise systems.
- Developed and maintained **Python** scripts for data migration tasks, automating the transfer and validation of information between legacy systems and the **Salesforce** platform.
- Supported production incidents and performed root cause analysis on **Java Spring Boot** applications and associated microservices within an enterprise environment.
- Configured and managed user roles, profiles, and security settings within **Salesforce** to ensure data integrity and compliance with enterprise security policies.
- Containerized **Java Spring Boot** applications using **Docker** and deployed them to **AWS EC2** instances, managing CI/CD pipelines with **Jenkins**.

PROJECTS

Salesforce Platform Expansion for Enterprise Integration

- Led the configuration and rollout of **Salesforce** across three newly acquired business units, standardizing core CRM processes.
- Developed **Python** scripts to automate data cleansing and migration from disparate legacy systems into the target **Salesforce** environment, reducing manual effort by approximately 40%.
- Designed and implemented custom reporting dashboards within **Salesforce** to provide visibility into M&A; integration progress and key performance indicators for executive stakeholders.

Internal CRM Data Migration and API Development

- Engineered a data migration strategy from an on-premise Oracle database to a cloud-hosted **PostgreSQL** instance, ensuring data integrity and minimal downtime.
- Built **Java Spring Boot** RESTful APIs to facilitate data synchronization between the migrated database and internal enterprise applications, supporting ~1,500 requests per hour.
- Developed **SQL** scripts for data validation and transformation, ensuring consistency and accuracy post-migration and supporting ongoing reconciliation workflows.
