HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Python** backend services using **AWS Lambda** and **CDK** for event-driven IoT device communication, processing approximately **5,000** events per hour.
- Designed and implemented **event-driven architectures** for asynchronous processing of device telemetry data, ensuring scalability for a growing fleet of connected devices.
- Constructed **Python** scripts to automate data ingestion and transformation pipelines for device logs, reducing manual processing time by **40%**.
- Integrated **RESTful APIs** within **Java Spring Boot** microservices to facilitate data exchange between backend systems and enterprise applications.
- Managed production support for critical enterprise applications using **Splunk** and **Dynatrace**, focusing on SLA adherence and P1/P2 incident resolution.
- Containerized backend services using **Docker** for consistent deployment across development and production environments on **AWS EC2**.
- Collaborated with cross-functional teams to define and refine technical requirements for new feature development, participating in **Agile Scrum** ceremonies.

SKILLS

Languages – Python, Java, SQL, R

Cloud – AWS (Lambda, EC2, S3, CloudWatch), Docker, CDK

Backend Frameworks – Spring Boot, FastAPI, Flask

Databases – PostgreSQL, MySQL, Oracle

Tools & Methodologies – Git, Jenkins, Jira, Confluence, Agile, Scrum, REST APIs, Event-Driven Architecture

Analytics & BI – Power BI, Tableau, pandas, NumPy, scikit-learn

PROJECTS

IoT Device Data Ingestion Pipeline (HCL Technologies)

- Engineered a **Python**-based data pipeline on **AWS Lambda** to ingest and process real-time data streams from a fleet of 500+ IoT devices.
- Implemented asynchronous processing using message queues, achieving a throughput of over **3,000 messages** per minute and reducing latency by **30%**.
- Developed **REST APIs** with **FastAPI** for device status monitoring and data retrieval, supporting integration with upstream operational dashboards.

Automated Log Analysis and Alerting System (HCL Technologies)

- Built **Python** scripts to parse and analyze large volumes of application logs from production systems, identifying critical errors and anomalies.
- Integrated with **Splunk** to create custom alerts for specific error patterns, reducing manual log review effort by approximately **20 hours** per week.
- Developed a simple reporting module to summarize daily system health metrics for the operations team, improving visibility into system stability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
