PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Temenos T24** performance test scripts using **Apache JMeter**, focusing on parameterization and correlation for realistic transaction flows.
- Executed comprehensive **load, stress, and endurance testing** on a core banking environment, simulating up to **5,000 concurrent users** during peak business hours.
- Analyzed **performance metrics** including response times, throughput, and error rates across application, database, and integration layers to pinpoint bottlenecks.
- Collaborated with **Temenos T24** application and infrastructure teams to investigate performance issues, conduct root cause analysis, and validate tuning improvements.
- Developed detailed **performance test reports and dashboards**, effectively communicating findings and recommendations to technical and programme stakeholders.
- Managed the lifecycle of performance-related defects, ensuring proper investigation, remediation, and re-testing to meet defined **service-level targets**.
- Configured and maintained **Jenkins pipelines** for automated execution of performance test suites within a complex enterprise environment.

SKILLS

Performance Testing Tools – Apache JMeter, LoadRunner, HP Performance Center

Core Banking Platforms – Temenos T24, Temenos Transact, Temenos Payments Hub (TPH)

Testing Methodologies – Non-Functional Testing, Performance Engineering, Load Testing, Stress Testing, Endurance Testing, Volume Testing, Scalability Testing

Core Banking Concepts – Core Banking Transaction Flows, Payments Processing, Reconciliation Workflows, Transaction Monitoring

Databases & Analysis – SQL, Database Performance Analysis, PostgreSQL, MySQL, Oracle

Development & Infrastructure – Java Spring Boot, Python, REST APIs, AWS, Docker, Kubernetes, CI/CD, Jenkins, Linux

PROJECTS

Core Banking Performance Optimization (HCL Technologies)

- Developed and executed **performance test scripts in Apache JMeter** for a financial services client's transaction processing system, simulating high-volume message flows.
- Identified and diagnosed performance bottlenecks within the **Java Spring Boot** application layer and **PostgreSQL** database, leading to a **15% reduction** in average transaction response times.
- Collaborated with cross-functional teams to establish performance baselines and define measurable non-functional requirements for critical banking operations.

Automated Performance Test Suite for Enterprise Applications (HCL Technologies)

- Designed and implemented an automated performance testing framework using **Apache JMeter** and **Jenkins** for various enterprise applications, enabling faster feedback cycles.
- Integrated performance test execution into the CI/CD pipeline, reducing the time to identify performance regressions by approximately **30%**.
- Provided detailed analysis and reporting on application performance under simulated load conditions to support release readiness reviews.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
