# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** REST APIs for cross-service data exchange, incorporating request validation and circuit-breaker patterns to ensure system resilience.
- Developed **Python scripts** to automate ETL processes for data ingestion into the financial-services dashboard, handling approximately **4,500 records** per batch job.
- Managed production support for enterprise applications, responding to P1/P2 incidents and performing root cause analysis using **Splunk** and **Dynatrace** to maintain service level agreements.
- Collaborated with client operations teams to gather requirements and provide UAT support for enhancements to the payments operations dashboard, ensuring alignment with business needs.
- Analyzed client data using **SQL** queries across PostgreSQL and Oracle databases to support audit investigations and identify trends in financial transaction flows.
- Contributed to the development and maintenance of **IT governance** frameworks by documenting technology control procedures and assessing adherence to best-practice standards.
- Containerized backend services using **Docker** and deployed them to **AWS EC2** instances, managing configuration via Jenkins pipelines for consistent environment builds.

## SKILLS

**Programming Languages** – Java, Python, SQL, R

**Frameworks & Libraries** – Spring Boot, pandas, NumPy, scikit-learn

**Cloud & DevOps** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

**Databases** – PostgreSQL, MySQL, Oracle

**BI & Analytics Tools** – Power BI, Tableau, DAX, Power Query

**Enterprise Systems & Support** – Jira, Confluence, Splunk, Dynatrace, IT Governance, Data Analytics

## PROJECTS

**Financial Services Transaction Monitoring System**

- Developed Java Spring Boot microservices to process and monitor inbound financial transaction messages, flagging exceptions for operational teams.
- Integrated with enterprise databases (PostgreSQL, Oracle) to retrieve historical transaction data for reconciliation workflows and audit trail generation.
- Built operational dashboards in Power BI, visualizing key metrics on transaction volumes and processing success rates for business stakeholders.

**Automated Data Reporting for ERP Systems**

- Created Python scripts to extract, transform, and load data from ERP modules into a data warehouse, automating the generation of weekly operational reports.
- Implemented data validation checks using pandas to ensure accuracy and completeness of extracted data before loading into the reporting database.
- Designed and deployed automated report generation using scheduled cron jobs on Linux servers, reducing manual effort by approximately **15 hours** per week.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
