HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, implementing RESTful APIs for data exchange between internal systems, handling approximately 1,500 requests per minute.
- Engineered efficient data extraction and transformation logic using **Python** and **pandas** to populate data warehouses, processing datasets of up to 500GB.
- Designed and implemented database schemas and optimized complex **SQL** queries across **PostgreSQL** and **MySQL** for reporting and application backends, improving query performance by an average of 30%.
- Collaborated with cross-functional teams to define technical specifications and estimate development effort for new features in an Agile Scrum environment.
- Containerized backend services using **Docker** and managed deployments on **AWS EC2** instances, contributing to a 15% reduction in deployment-related incidents.
- Wrote and executed unit tests using **JUnit**, achieving over 85% code coverage for critical Java modules and ensuring code quality through peer code reviews.
- Provided production support for enterprise applications, monitoring system health via **Splunk** and **Dynatrace**, and resolving P1/P2 incidents within defined SLAs.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Microservices, Python, Flask, FastAPI, Hibernate, JPA, JUnit, Maven

Data Engineering & Analytics – SQL, PostgreSQL, MySQL, Oracle, pandas, NumPy, ETL, Data Warehousing, Power BI, Tableau, R

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux, Shell Scripting

API Integration – API Design, System Integration, Data Exchange, Change Management

Methodologies – Agile, Scrum, CI/CD, Code Reviews, Incident Response

PROJECTS

Enterprise Java Integration Service

- Developed a **Java Spring Boot** service to integrate disparate enterprise systems, facilitating data synchronization across a legacy ERP and a new CRM platform.
- Implemented robust error handling and retry mechanisms using **Hibernate**, ensuring data integrity and reducing data loss incidents by 40% during peak loads.
- Designed and documented the RESTful API contract for the integration service, enabling seamless consumption by downstream applications and supporting 5 distinct client integrations.

Automated Data Processing Pipeline

- Built an automated data processing pipeline using **Python** and **pandas** to ingest, clean, and transform data from multiple sources, including CSV and database extracts.
- Engineered data validation checks within the pipeline that identified and flagged over 2,000 malformed records per week, improving data quality for downstream analytics.
- Deployed the pipeline as a scheduled job on **AWS Lambda**, processing approximately 10,000 records daily with a p95 execution time under 5 minutes.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
