PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **10+ new product features** for multiphase power controllers, directly supporting customer design-in activities and product definition.
- Authored comprehensive **technical literature** including application notes and datasheets to facilitate customer adoption and understanding of advanced power management ICs.
- Led **product bench testing and analysis** for new multiphase power controllers, ensuring product development completion and readiness for customer design-ins.
- Collaborated with a **cross-discipline team** focused on new product development and customer design-ins for the computing power market.
- Provided **in-depth technical training** to field application engineers and customers on new product capabilities and applications.
- Developed **evaluation boards and device software** to support customer design-in efforts for advanced multiphase power controllers.
- Containerized **Java Spring Boot applications** and deployed them to an **AWS EKS cluster**, managing CI/CD pipelines with Jenkins for consistent releases.

SKILLS

Domain Knowledge – Power Electronics Design, Multiphase Power Controllers, Computing Applications, Product Definition, Design-In Support

Software Development – Java, Spring Boot, Python, C/C++ (for embedded systems)

Tools & Technologies – Simplis, Mathcad, Orcad, Allegro, FPGA, JTAG, Jenkins, Git, Jira, Confluence, AWS, Docker, Kubernetes

Technical Documentation – Application Notes, Datasheets, Technical Literature, Technical Seminars

Methodologies – Agile, Scrum, Project Management, Problem Solving, Debugging

PROJECTS

Advanced Power Controller Design-In Kit

- Developed a comprehensive **design-in kit** for a new multiphase power controller, including **evaluation boards** and sample device software, to accelerate customer adoption.
- Authored detailed **application notes and user guides** explaining optimal implementation strategies and performance characteristics, reducing customer integration time by an estimated **20%**.
- Collaborated with the product definition team to refine hardware specifications based on early customer feedback gathered during technical deep-dive sessions.

Embedded Software for Power Management Systems

- Engineered embedded **Python scripts** to automate the testing and validation of power management ICs, simulating various load conditions and communication protocols.
- Integrated **RESTful APIs** developed in **Java Spring Boot** with an internal feature store for managing device configurations and performance telemetry.
- Wrote unit tests using **JUnit** to ensure the reliability and correctness of critical control logic within the embedded software components.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
