PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Defined and operated governance frameworks for Technology Asset Management and CMDB across multiple enterprise platforms.
- Established metrics, scorecards, and reporting mechanisms to monitor asset and CMDB health, identifying data quality risks for remediation.
- Developed audit-ready documentation and provided evidence for internal and external reviews, ensuring compliance with governance requirements.
- Collaborated with cross-functional teams to define standards, controls, and governance expectations, embedding them into operating processes.
- Analyzed enterprise data to identify control gaps and governance risks, translating findings into actionable remediation plans for technology stakeholders.
- Implemented continuous improvement initiatives across governance practices and operating routines, strengthening enterprise data standards.
- Managed priorities and drove accountability for technology asset and CMDB governance tasks within a hybrid work environment.

SKILLS

Governance & Compliance – Technology Asset Management, CMDB, Data Quality, Risk Management, Compliance, Audit Reporting, Controls Design, Process Improvement

Enterprise Platforms – ServiceNow, CMDB Repositories, Asset Data Sources, Enterprise Systems

Data Analysis & Reporting – Analytical Skills, Metrics, Scorecards, Data Visualization, Reporting, Trend Analysis

Process & Operations – Technology Lifecycle Management, ITSM, Operating Processes, Change Management, Incident Response

Core Technologies – SQL, Python, Java, Spring Boot, AWS, Docker, Linux, Jira, Confluence

Methodologies – Agile, Scrum, ITIL, IAITAM

PROJECTS

Technology Governance Framework for Enterprise Assets

- Designed and implemented a comprehensive governance framework for managing technology assets and CMDB data across a large enterprise.
- Defined key data quality metrics and control points, integrating them into existing operational processes to ensure data integrity and compliance.
- Developed standardized reporting dashboards that provided clear visibility into asset health, risk exposure, and compliance posture for senior management.

Data Quality Improvement for Financial Operations Systems

- Analyzed transaction data and operational logs from a financial services dashboard to identify data quality issues impacting reconciliation workflows.
- Developed Python scripts to automate data validation checks and generate exception reports, reducing manual review effort by approximately 30%.
- Collaborated with operations teams to define data cleansing procedures and implement controls that improved the accuracy of payment message monitoring.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
