## PROFESSIONAL EXPERIENCE — 3.5 YEARS

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Provided first-line technical support to customers via phone and email, diagnosing faults on **sensors**, **transmitters**, and **industrial communications** (4–20 mA, Modbus) for a range of enterprise clients.
- Configured, assembled, and bench-tested **instrumentation**, panels, and monitoring systems in the workshop, ensuring quality checks were completed prior to dispatch to customer sites.
- Attended customer sites to commission and calibrate equipment, working alongside field teams and independently once trained on flow measurement and water quality analysis systems.
- Developed and maintained technical documentation, including **commissioning records**, **calibration certificates**, and **service reports**, adhering to ISO 9001 quality management system standards.
- Contributed to a workshop automation initiative by developing, assembling, and testing automated test and configuration processes, improving efficiency by an estimated **15%**.
- Diagnosed and resolved faults on site and in the workshop across **loop wiring**, **power supplies**, and various **industrial communication protocols**, reducing average resolution time by **20%**.
- Managed workshop inventory, including stock of spares and demo units, and oversaw the calibration and repair of test equipment, ensuring readiness for field deployments.

## SKILLS

**Instrumentation & Electrical** – 4-20 mA loops, sensors, transmitters, signal conditioning, loop wiring, power supplies, relays, sensor calibration, test equipment, P&IDs;, electrical drawings.

**Industrial Communications** – Modbus RTU/TCP, Profinet, Profibus, HART, Ethernet/IP, industrial networking.

**Technical Support** – Configuration, fault diagnosis, remote connection support, site commissioning, calibration, maintenance, documentation, O&M; manuals, wiring schedules.

**Quality & Compliance** – ISO 9001:2015, documentation standards, regulated environments (pharma, food/beverage, water utilities).

**Automation & Scripting** – Workshop automation, automated test processes, Python scripting, data pipelines.

**Software & Tools** – Splunk, Dynatrace, Jira, Confluence, Jenkins, Git, Linux, shell scripting, Microsoft Office Suite (Word, Excel), Power BI, Tableau.

## PROJECTS

### Workshop Automation for Instrumentation Testing

- Designed and implemented an automated test rig using Python scripting to streamline the configuration and quality checking of multi-point monitoring systems.
- Developed custom test sequences that reduced manual configuration time for standard sensor panels by approximately **30%**, allowing for faster dispatch.
- Integrated feedback mechanisms into the automated process to log test results and flag deviations, improving traceability for ISO 9001 compliance.

### Customer Site Commissioning & Support Framework

- Created a standardized checklist and documentation template for site commissioning activities, ensuring consistent and thorough on-site execution for flow measurement and water quality analysers.
- Developed a knowledge base of common fault scenarios and resolutions for Modbus and 4–20 mA loop issues, accessible to both field and office support teams.
- Provided remote technical assistance to customers based on the new framework, improving first-contact resolution rates by **18%** for recurring issues.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
