PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Implemented **Python scripting** for automating data ingestion and ETL processes, reducing manual effort by an estimated **15 hours per week**.
- Managed production support for enterprise Java/.NET applications using **Splunk** and **Dynatrace**, ensuring adherence to SLAs and responding to P1/P2 incidents.
- Developed and maintained **Java Spring Boot** REST APIs for core business services, facilitating data exchange between disparate enterprise systems.
- Provided technical expertise and troubleshooting support for critical **Fill and Finish manufacturing equipment**, collaborating with production and quality teams to resolve constraints.
- Analyzed equipment performance metrics including **MTBF** and **MTTR**, identifying trends to inform predictive maintenance strategies and reduce unplanned downtime.
- Participated in **cGMP compliance** activities and change control processes, ensuring all equipment modifications met regulatory requirements.
- Managed infrastructure on **AWS EC2** instances and utilized **Docker** for containerizing applications, supporting deployment pipelines via **Jenkins**.

SKILLS

Reliability Engineering – RCA, FMEA, RCM, MTBF, MTTR, OEE, predictive maintenance, preventive maintenance, condition-based monitoring

Manufacturing & Compliance – Fill Finish manufacturing, sterile manufacturing, cGMP, FDA, EMA, regulatory compliance, change control, aseptic processing

Programming & Scripting – Python, Java, Spring Boot, REST APIs, SQL, shell scripting

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Data Analysis & Tools – Splunk, Dynatrace, Power BI, Tableau, R, pandas, NumPy, scikit-learn, PostgreSQL, MySQL, Oracle

PROJECTS

Automated Equipment Performance Monitoring System (HCL Technologies)

- Developed a **Python**-based system to collect and aggregate equipment performance data from multiple sources, including sensors and maintenance logs.
- Implemented data processing pipelines using **pandas** and **SQL** to clean and structure raw data for analysis, enabling the calculation of key reliability metrics like **MTBF**.
- Created interactive **Power BI** dashboards to visualize equipment uptime, failure rates, and maintenance trends for operational teams, supporting proactive intervention strategies.

Predictive Maintenance Strategy for Manufacturing Assets (HCL Technologies)

- Designed and documented a framework for implementing predictive maintenance, incorporating **condition-based monitoring** techniques.
- Conducted **FMEA** on critical manufacturing line components to identify potential failure modes and prioritize maintenance efforts.
- Collaborated with maintenance engineers to map out standard operating procedures for new predictive maintenance tasks, enhancing equipment reliability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
