PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided **Level 3 technical support** for critical aircraft systems, resolving complex engineering queries and defect escalations for maintenance teams across **Boeing 737** and **Airbus A320** fleets.
- Investigated and provided technical guidance on **Bleed Issues** and **Repeat Items**, analysing aircraft system logs and maintenance records to advise on corrective actions and prevent recurrence.
- Actioned urgent **diagnostic alerts** including CNRs and ACMS data, performing immediate analysis to support flight operations and minimize dispatch delays.
- Developed and reviewed **technical instructions** and troubleshooting guides for aircraft maintenance procedures, ensuring clarity and accuracy for engineering staff.
- Collaborated effectively with **Maintenance Control**, **Line Maintenance**, and **Base Maintenance** teams, communicating technical findings and solutions under demanding operational pressures.
- Managed ad-hoc engineering tasks assigned by the Chief Engineer and Tech Services Management, demonstrating flexibility and efficiency in a fast-paced airline environment.
- Contributed to the continuous improvement of technical documentation and support processes, integrating feedback from maintenance personnel to enhance operational efficiency.

SKILLS

Aviation Regulations – EASA Part M, Part CAMO, Part 145

Aircraft Systems – Boeing 737, Airbus A320, Bleed Issues, ACMS

Technical Support – Troubleshooting, Defect Queries, Engineering Support, Root Cause Analysis

Documentation – Technical Instructions, Engineering Documentation, Process Improvement

Tools & Technologies – Jira, Confluence, Splunk, Dynatrace, Linux Shell Scripting

PROJECTS

Aircraft System Diagnostic Alert Resolution

- Developed a structured approach for analyzing urgent diagnostic alerts (e.g., CNRs, ACMS) impacting flight operations, reducing average resolution time by **18%**.
- Collaborated with cross-functional engineering teams to debug and resolve complex system faults, ensuring minimal disruption to the flight schedule.
- Documented common alert patterns and their resolutions, building a knowledge base that supported junior engineers in the Technical Services department.

Maintenance Procedure Technical Documentation Enhancement

- Reviewed and updated existing technical documentation for aircraft maintenance tasks, incorporating feedback from line and base engineers to improve clarity and usability.
- Authored new troubleshooting guides for recurring defect types, focusing on providing actionable steps for maintenance personnel to resolve issues efficiently.
- Ensured all documentation adhered to EASA Part 145 standards and internal quality assurance protocols for technical content.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
