HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **vulnerability remediation solutions** for network and network security technologies, focusing on routers, switches, and firewalls, completing **3 major upgrade cycles**.
- Assumed shared responsibility for **Windows and Linux server vulnerability remediation**, performing patch assessments and coordinating deployment with server operations teams.
- Developed and implemented **automated patching solutions** for network devices, reducing manual intervention time by an estimated **40%** for routine upgrades.
- Analyzed large volumes of raw vulnerability and configuration data, translating findings into **prioritized remediation plans** and technical validation reports for infrastructure changes.
- Engineered **Python scripts** to automate the collection and parsing of network device configurations for security compliance checks, processing over **500 devices** nightly.
- Participated in the **on-call rota** for infrastructure security incidents, providing 24/7 support and rapid response to critical vulnerability alerts.
- Managed **change control processes** for network upgrades and security patches, ensuring validated configuration backups and rollback plans were in place prior to deployment.

SKILLS

Network Security – Vulnerability Management, Firewalls, Routers, Switches, DNS, DHCP, IPAM, Application Delivery Controllers, Load Balancers, Network Security Technologies

Operating Systems – Linux, Windows Server

Scripting & Automation – Python, Shell Scripting

Cloud & Infrastructure – AWS, EC2, S3, Lambda, CloudWatch, Docker, Jenkins, Git

Databases & Data Analysis – SQL, PostgreSQL, MySQL, Oracle, Splunk, Dynatrace

Methodologies – Agile, Scrum, Change Management, Incident Response

PROJECTS

Network Device Vulnerability Remediation Automation

- Developed Python scripts to automate the discovery and patching of vulnerabilities across a fleet of **enterprise network devices** (routers, switches, firewalls).
- Integrated script execution with **Jenkins CI/CD pipelines** to orchestrate automated deployments, reducing manual patching effort by **30%**.
- Designed and implemented a data parsing module to analyze device logs and configuration outputs for security compliance, flagging deviations from hardened standards.

Infrastructure Security Operations Dashboard

- Built an operational dashboard using **Power BI** to visualize network vulnerability status, remediation progress, and critical security alerts across the infrastructure estate.
- Developed **DAX measures** and data models to aggregate vulnerability data from multiple sources, providing actionable insights for security operations teams.
- Configured Power Query to ETL diverse data feeds, including scan results and asset inventory, into a unified dataset for reporting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
