

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed **AI agents** and **LLM-powered components** for intelligent claim-processing solutions, creating reusable backend services and APIs using **Python**.
- Built and enhanced **agentic systems** capable of reasoning and decision-making, integrating them into existing business platforms and workflows to automate operational tasks.
- Developed production-grade **AI and machine learning solutions**, including classification and decisioning components, leveraging **Azure-based AI services** and integrations.
- Engineered **Python data pipelines** on **AWS Lambda** and **S3** to support ML model training, processing approximately 3,500 events per second during peak hours.
- Developed and maintained **ML pipelines** and **deployment processes** using **Docker** and **Kubernetes**, ensuring scalable and reliable AI solution delivery.
- Collaborated with **AI Architects**, **Technical Leads**, and **Product Teams** to define emerging AI development practices and standards, contributing to innovation and proof-of-concepts.
- Containerized AI services with **Docker** and deployed them to a **Kubernetes cluster** (EKS), configuring resources and managing rolling updates for predictable delivery.

SKILLS

AI/ML – AI Agents, Agentic Systems, Large Language Models (LLMs), Natural Language Processing (NLP), Machine Learning (ML), Generative AI, Prompt Engineering, RAG, MCPs, Agent Orchestration Frameworks

Programming Languages – Python, SQL, Java

Cloud Platforms – Azure, AWS (EC2, S3, Lambda, CloudWatch)

Containerization & Orchestration – Kubernetes, Docker

Development Tools & Practices – REST APIs, MLOps, CI/CD, GitHub Copilot, Claude Code, AI Development Agents, Git, Jenkins, Jira, Confluence

Databases & Data Processing – PostgreSQL, MySQL, Oracle, Pandas, NumPy

Frameworks & Libraries – Spring Boot, Flask, FastAPI, Scikit-learn

PROJECTS

AI-Powered Claims Processing Engine

- Developed a **Python-based AI engine** to automate intelligent claims processing, incorporating **LLM integration** for document analysis and classification.
- Built **scalable REST APIs** using **FastAPI** to serve the AI models, handling an average of 500 requests per minute with p95 latency under 200ms.
- Designed and implemented **ML pipelines** on **Azure** for model retraining and deployment, reducing manual processing time for claim triage by approximately 40%.

Customer Onboarding Automation Platform

- Engineered a **Python automation platform** to streamline the onboarding of new enterprise customers for an internal AI service, reducing setup time from 4 weeks to 10 days.
- Developed interactive **documentation and tutorials** for customer integration teams, leading two post-sales technical walkthrough sessions to ensure successful adoption.
- Integrated a **decisioning component** that automatically assessed customer environment readiness based on predefined criteria, flagging 15% of potential integration issues pre-deployment.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
