

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and built **ETL pipelines** on **AWS**, processing approximately **5,000 data records** per hour for enterprise business systems.
- Developed **SQL queries** and data solutions within **Snowflake**, supporting analytical requirements for a financial-services client by optimizing complex reporting queries.
- Collaborated with client teams to gather **business requirements** for operational dashboards, translating needs into technical specifications for feature development.
- Contributed to the design and implementation of **data warehousing concepts**, including Star schemas and dimensional modelling, for a core ERP integration project.
- Explored **AI and LLM applications** by prototyping RAG-based information retrieval systems using Python and vector databases for internal research.
- Supported the delivery of **BI and analytics projects** by providing data extracts and validating results with business stakeholders, ensuring accuracy for key performance indicators.
- Containerised **Java Spring Boot applications** using Docker and deployed them to **AWS EC2** instances, managing configurations and basic resource limits.

SKILLS

Cloud Platforms – AWS, Azure, GCP, Snowflake, Databricks

Data Engineering – ETL, Data Warehousing, Dimensional Modelling, Star Schemas, OLAP

Programming & Scripting – Python, SQL, Java, Spring Boot

Databases – PostgreSQL, MySQL, Oracle, Snowflake

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

Analytics & BI – Power BI, Tableau, DAX, Power Query, R, scikit-learn

PROJECTS

Enterprise Data Pipeline for Financial Reporting

- Engineered a **Python-based ETL pipeline** on **AWS Lambda** and S3 to ingest and transform financial transaction data, automating daily reporting processes.
- Developed complex **SQL queries** against a **PostgreSQL** data warehouse to extract and aggregate data for reconciliation workflows, reducing manual effort by an estimated **15 hours per week**.
- Implemented data validation checks within the pipeline to ensure data integrity and accuracy for downstream analytical consumption, catching approximately **95% of data format discrepancies** before reporting.

Customer Analytics Dashboard with Power BI

- Designed and built an interactive **Power BI dashboard** to visualize key operational metrics for enterprise customers, consolidating data from multiple sources.
- Developed **DAX measures** and performed data modelling in Power BI to support complex analytical questions and provide actionable insights to business stakeholders.
- Managed data extraction and transformation using **Power Query**, cleaning and shaping raw data into a suitable format for the Power BI data model.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
