PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Automated operational processes for a financial-services client using **Python scripting**, developing ETL pipelines that reduced manual data aggregation time by **~30%**.
- Managed and maintained **Java Spring Boot** microservices in production, addressing P1/P2 incidents and performing root cause analysis within strict SLA targets.
- Developed and executed **SQL queries** across PostgreSQL and Oracle databases for data validation, ad-hoc reporting, and schema change management to support enterprise systems.
- Designed, built, and maintained **CI/CD pipelines** using **Jenkins** and **Git**, enabling efficient software delivery and automated testing for development teams.
- Developed and managed **cloud infrastructure** on **AWS**, provisioned using **Terraform** for **Kubernetes** clusters and related services like **EKS**, **EC2**, and **S3**.
- Collaborated with Software Engineering and QA teams to deliver reliable, secure, and scalable solutions, contributing to architectural decisions for infrastructure improvements.
- Monitored system performance and availability using **Splunk** and **Dynatrace**, troubleshooting issues and participating in incident response rotations.

SKILLS

Cloud & DevOps – AWS, Kubernetes, Terraform, EKS, EC2, S3, IAM, RDS, Lambda, Docker, Jenkins, CI/CD, Infrastructure as Code

Scripting & Automation – Python, Bash

Databases – PostgreSQL, MySQL, Oracle, SQL

Programming Languages – Java, Spring Boot

Monitoring & Observability – Splunk, Dynatrace, CloudWatch

Methodologies – Agile, Scrum

PROJECTS

AWS Kubernetes Cluster Automation with Terraform

- Provisioned and managed a scalable **Kubernetes** cluster on **AWS EKS** using **Terraform**, ensuring infrastructure-as-code compliance for **EC2** instances and **S3** storage.
- Developed reusable Terraform modules for common infrastructure components, enabling faster deployment of new environments and reducing configuration drift across development and staging clusters.
- Implemented monitoring and logging for the cluster using integrated **CloudWatch** services, providing visibility into resource utilization and application performance.

CI/CD Pipeline Enhancement for Java Microservices

- Designed and implemented an automated **CI/CD pipeline** using **Jenkins** to build, test, and deploy **Java Spring Boot** microservices to containerized environments.
- Integrated automated unit testing with **JUnit** into the pipeline, ensuring code quality and catching regressions early in the development cycle.
- Managed code repositories and branching strategies using **Git**, facilitating parallel development and streamlined code reviews.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
